Contribution of Civilizations and Sciences

 Copy

I consider the contribution of Arab, Indian, and Chinese cultures important for the development of science and civilization.

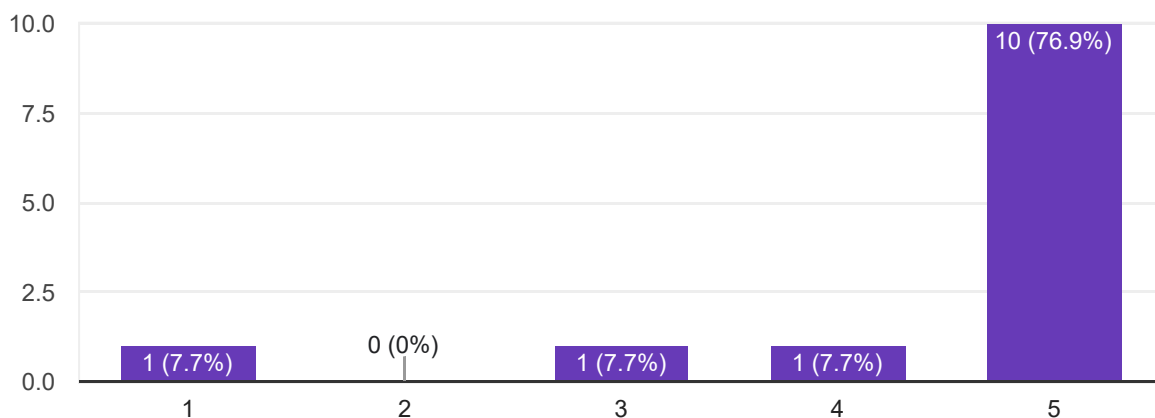

13 responses

 Copy

I know examples of discoveries or inventions from these cultures that we still use today.

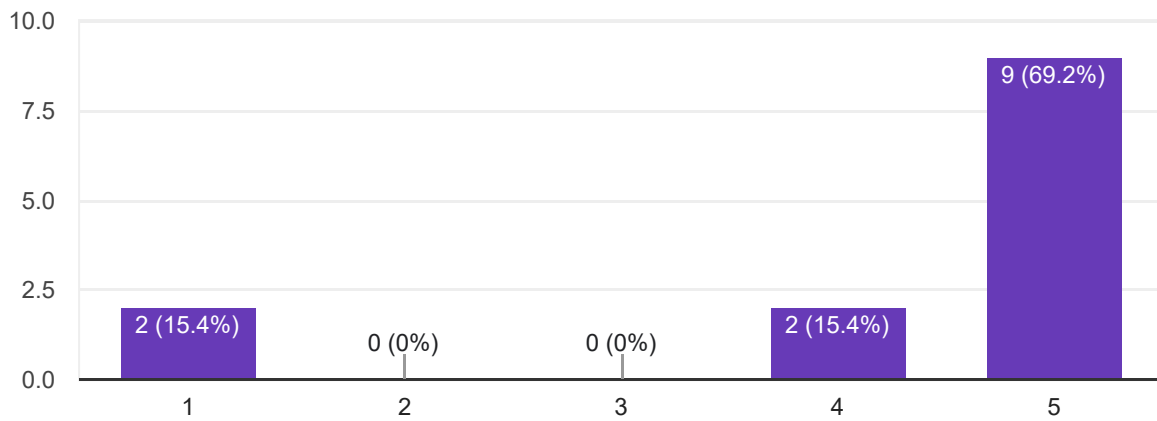

13 responses

After the presentation, I better understand the importance of scientific contributions from different civilizations.

13 responses

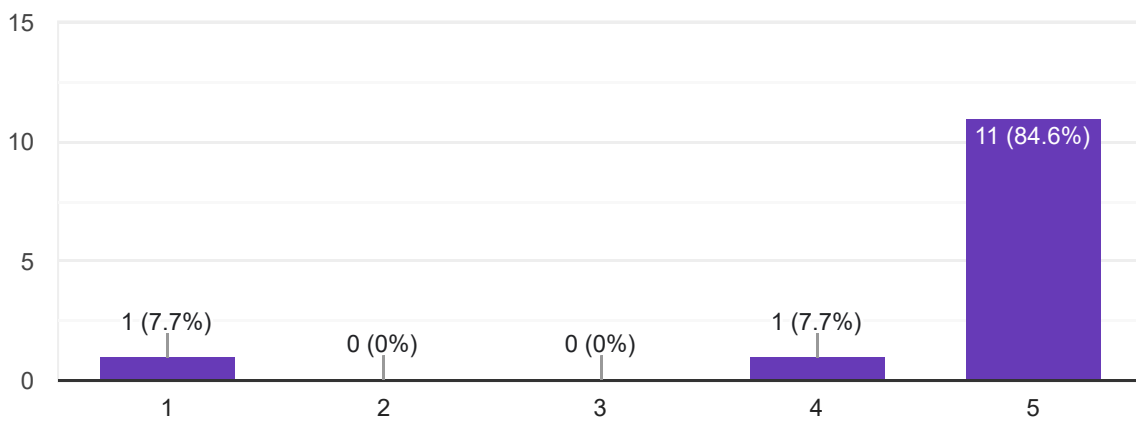

Religion and Social Cooperation

I would willingly sit next to a classmate of a different religion or cultural background.

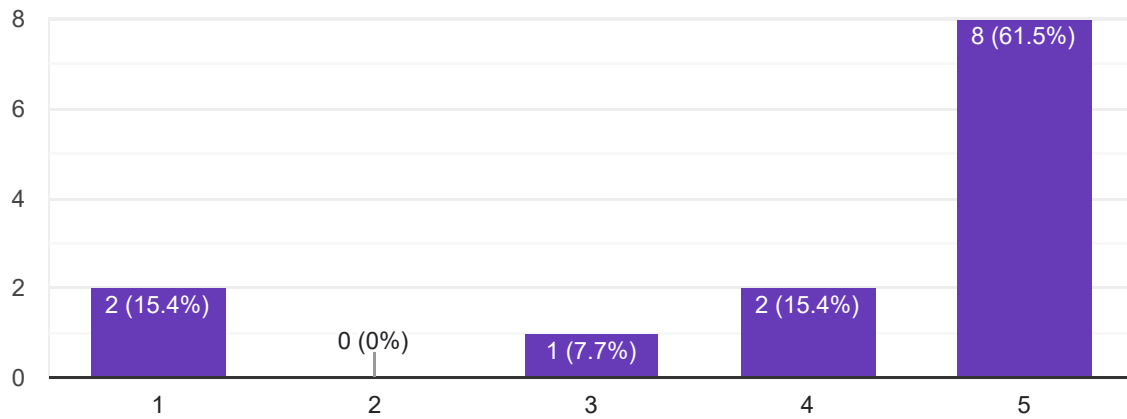

13 responses

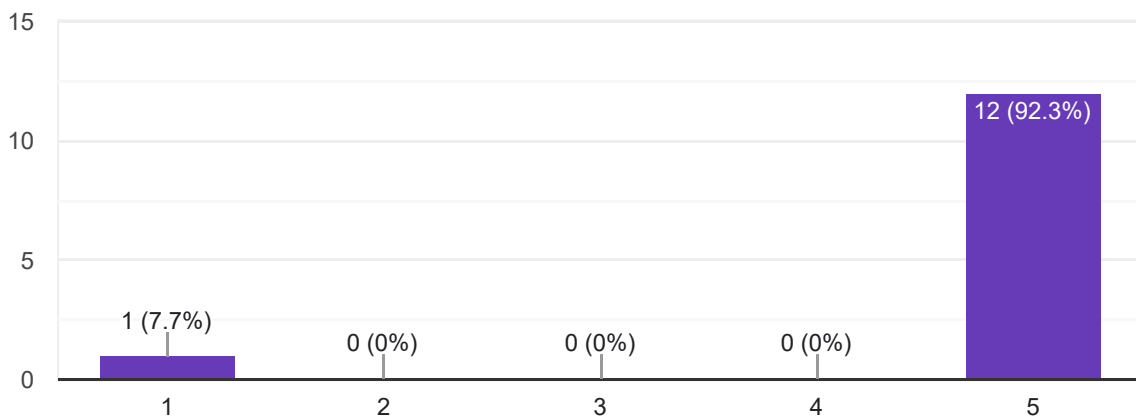

I find it easy to cooperate with people of different religious beliefs.

13 responses

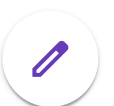

After the presentation, I feel greater respect and understanding toward people of different religions.

13 responses

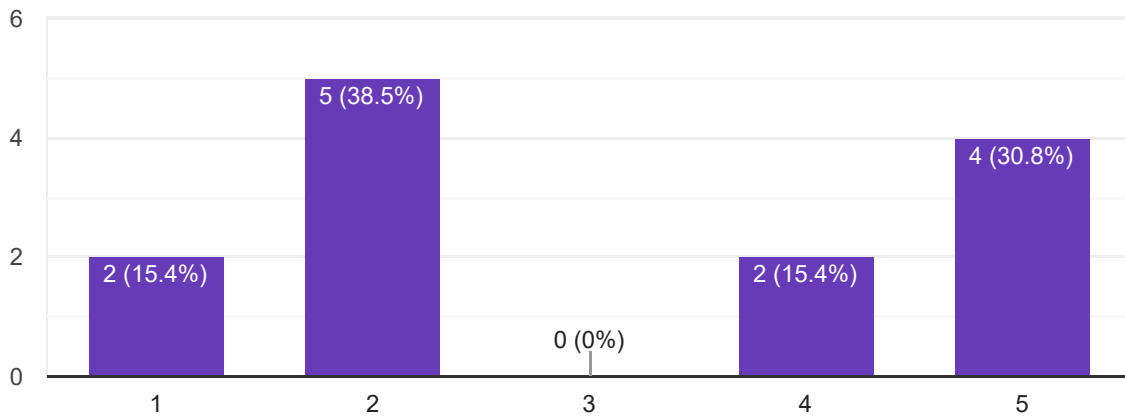

Diversity in Sexual Orientation and Acceptance

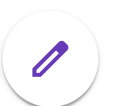

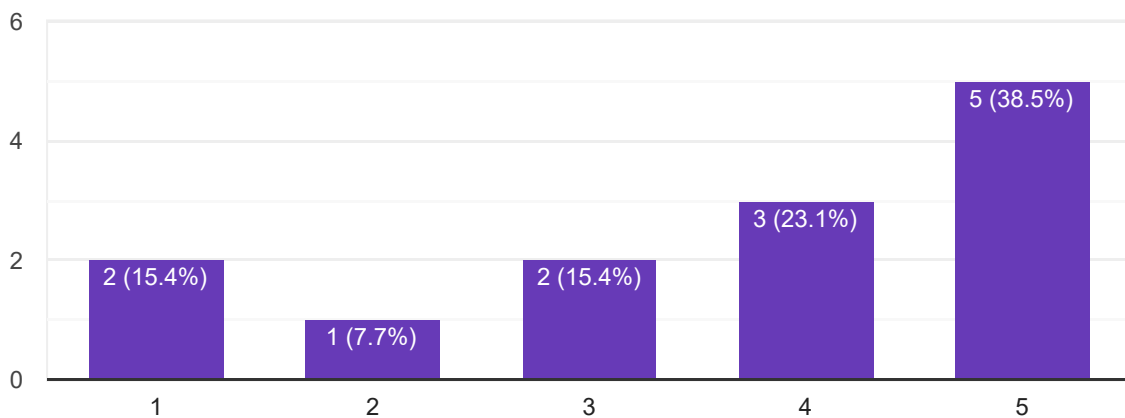

I feel comfortable cooperating with a classmate who identifies as LGBTQ+

13 responses

I believe that sexual orientation does not affect a person's abilities or character.

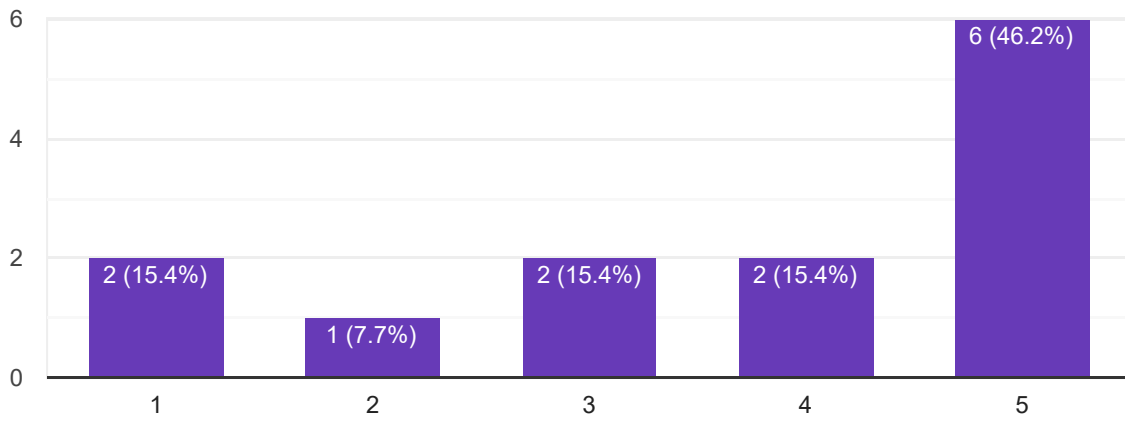

13 responses

After the presentation, I better understand the importance of accepting diversity.

13 responses

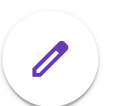

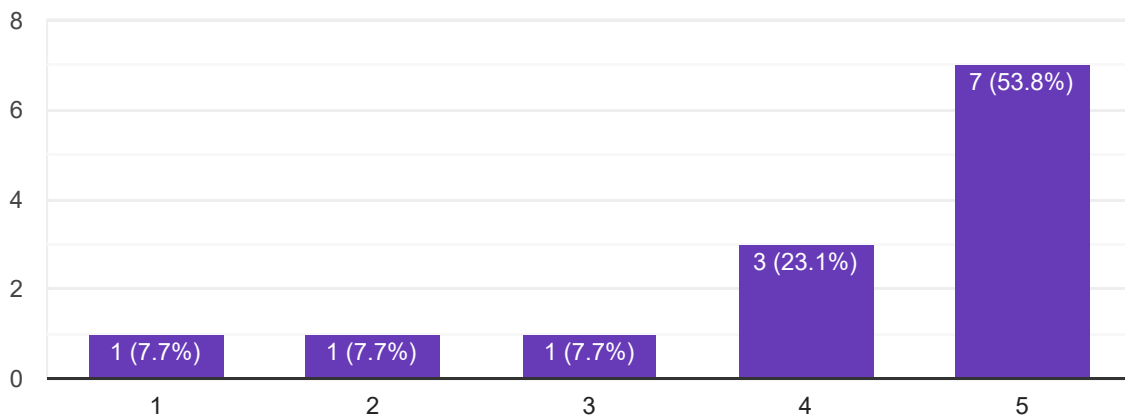

People with Disabilities

I believe that people with disabilities can succeed just like anyone else in school, work, and sports.

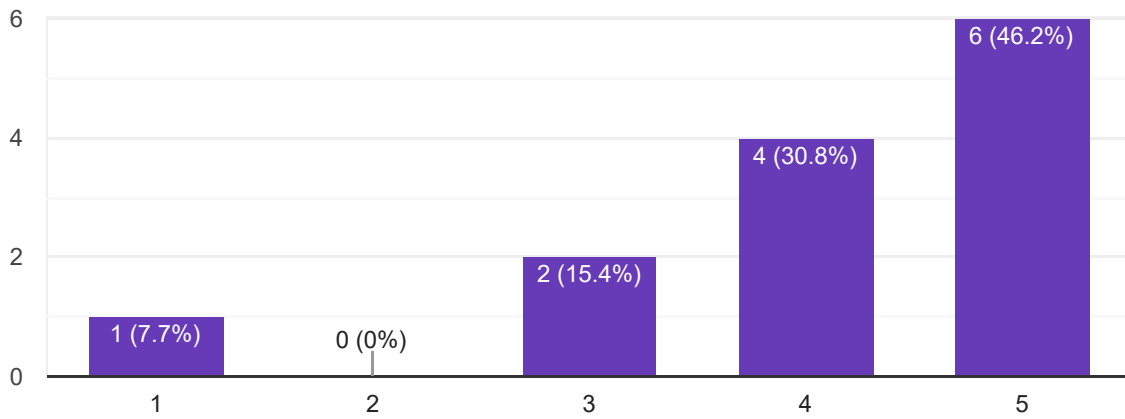

13 responses

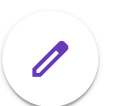

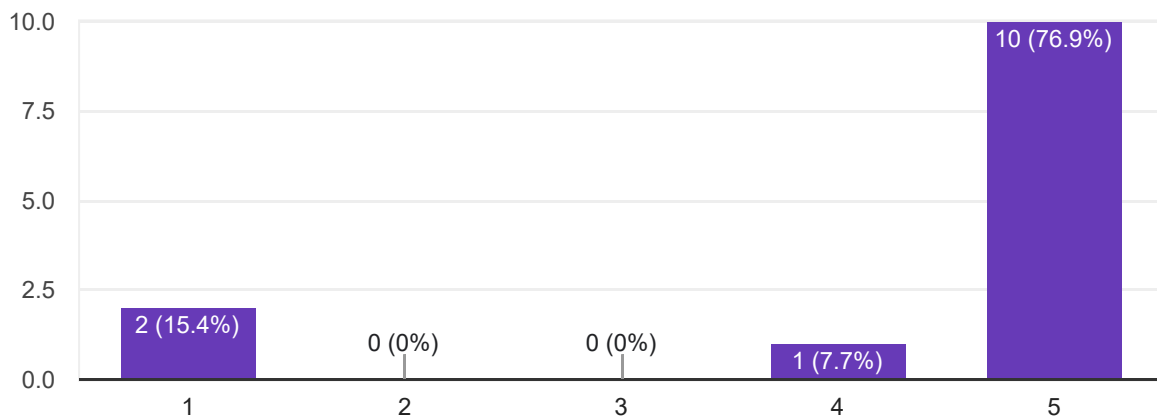

I would feel comfortable working in a group with a classmate who has a disability.

13 responses

After the presentation, I feel more respect and understanding for the challenges and abilities of people with disabilities.

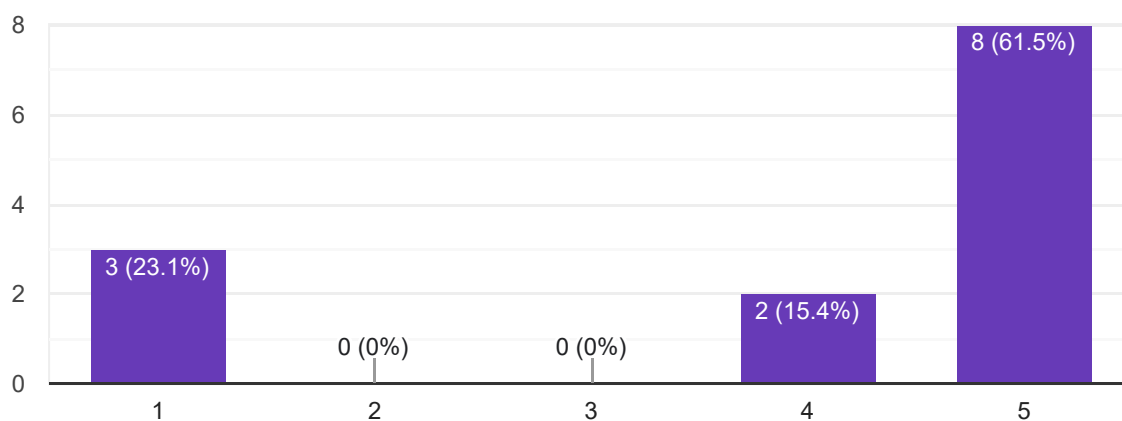

13 responses

It is fair to grade students with learning difficulties in ways that match their individual learning needs.

13 responses

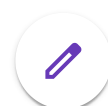

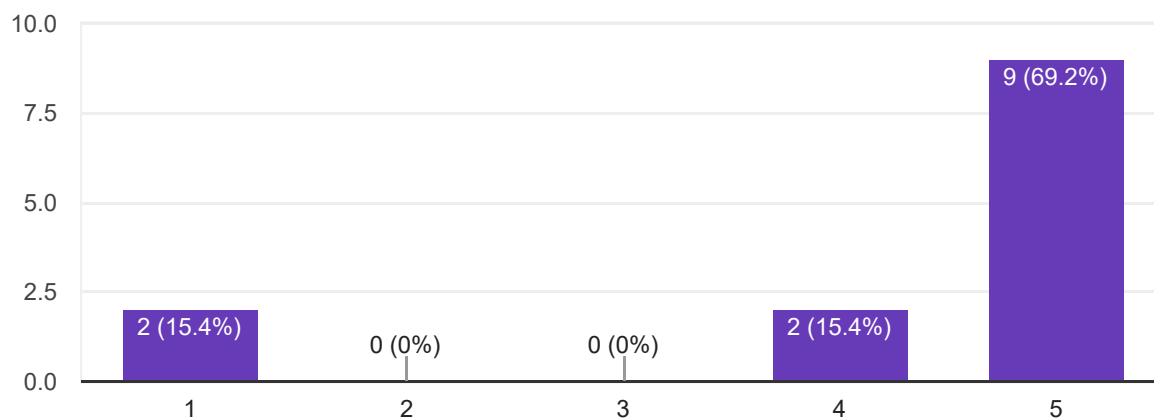

Gender Equality & Roles

I believe that women and men have equal abilities in mathematics and science.

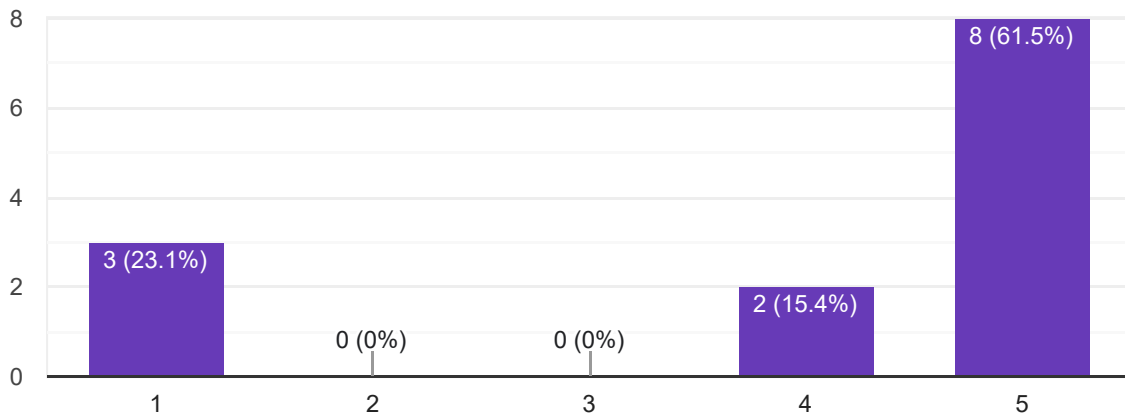

13 responses

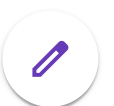

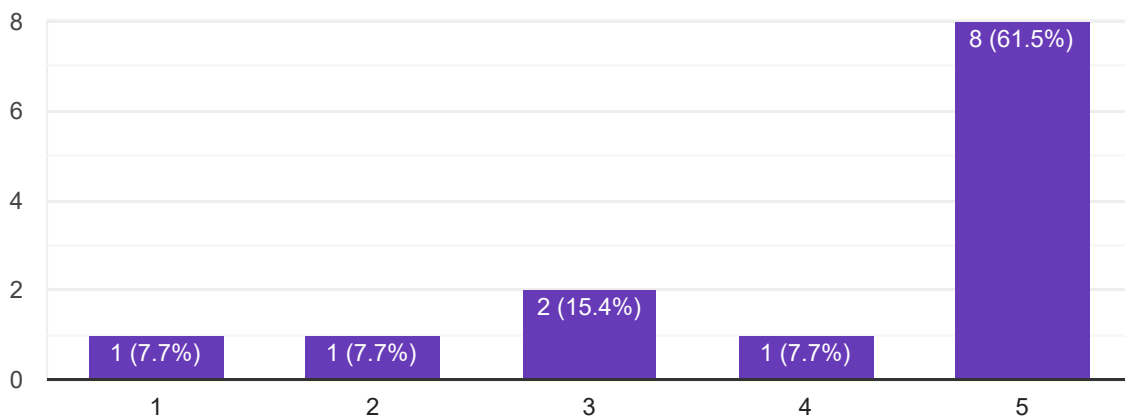

I believe women can succeed just as easily as men in technical or leadership professions (e.g., engineer, pilot, principal).

13 responses

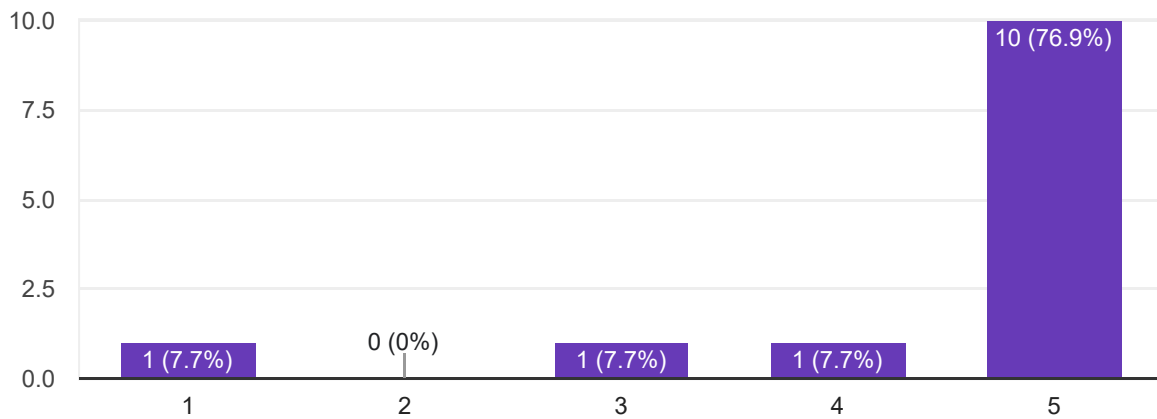

I believe that household responsibilities should be shared equally between women and men.

13 responses

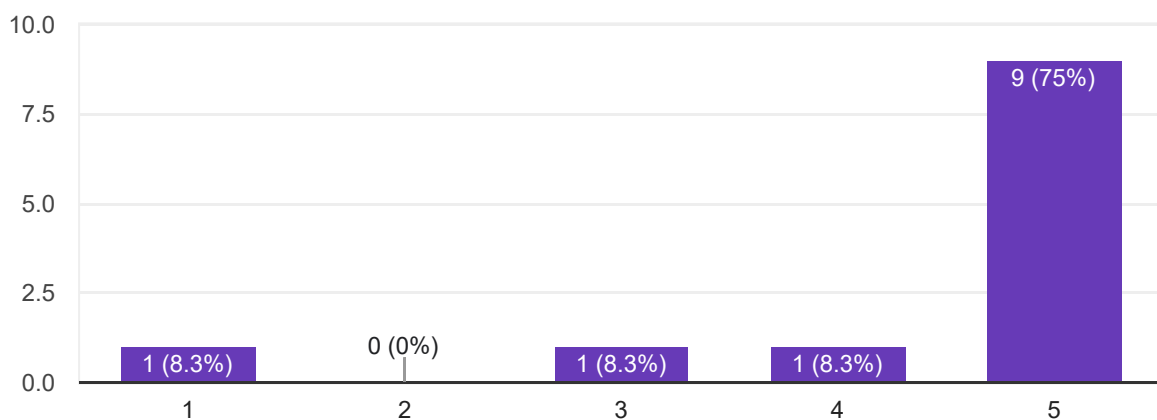

After the presentation, I better understand the importance of women's contributions to science, society, and history.

13 responses

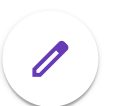

I believe that stereotypes about women can influence their school choices and career opportunities.

12 responses

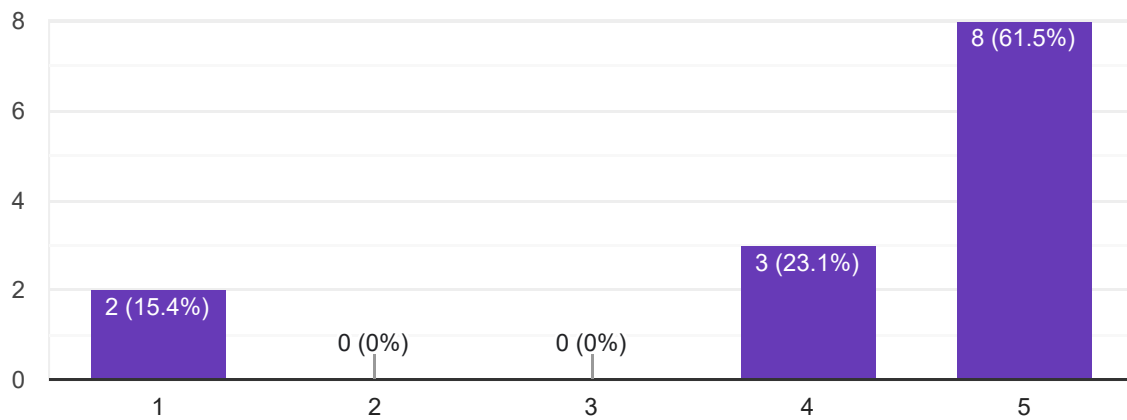

Race, Opportunities & Social Inequalities

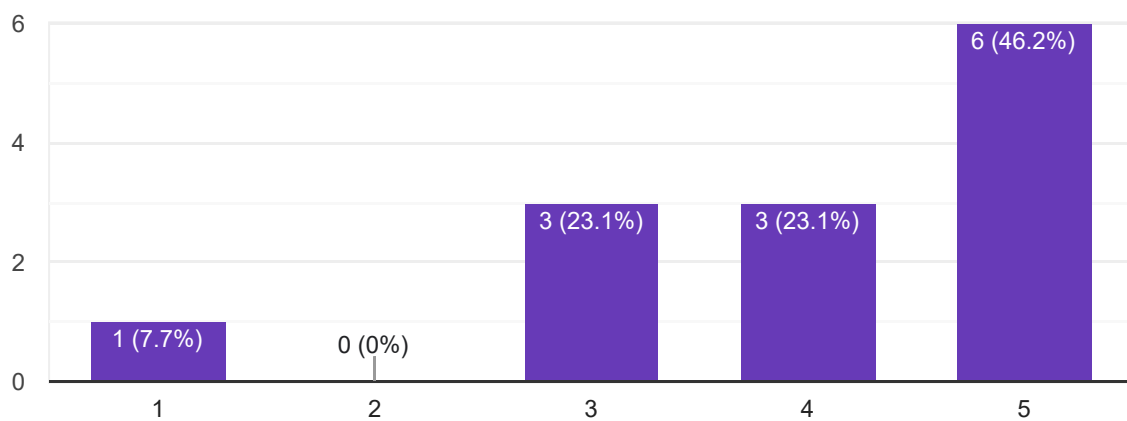

I believe that race does not determine a person's abilities or character.

13 responses

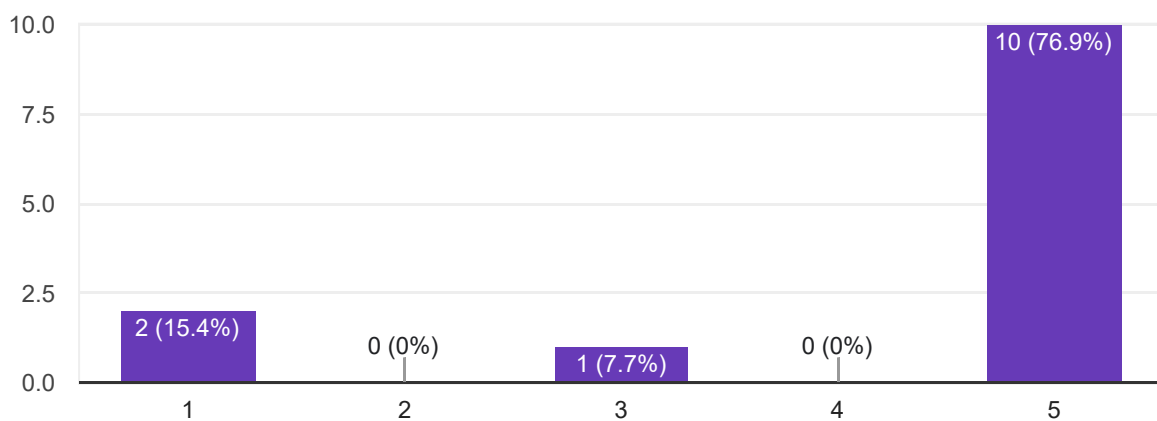

I believe that differences in opportunities between racial groups are mostly due to social and economic inequalities.

13 responses

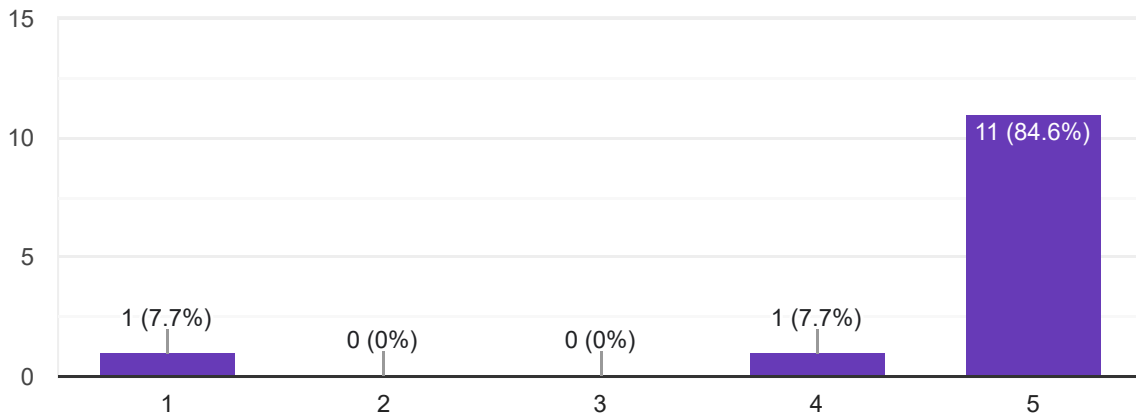

I do not believe that crime is related to skin color or ethnicity.

13 responses

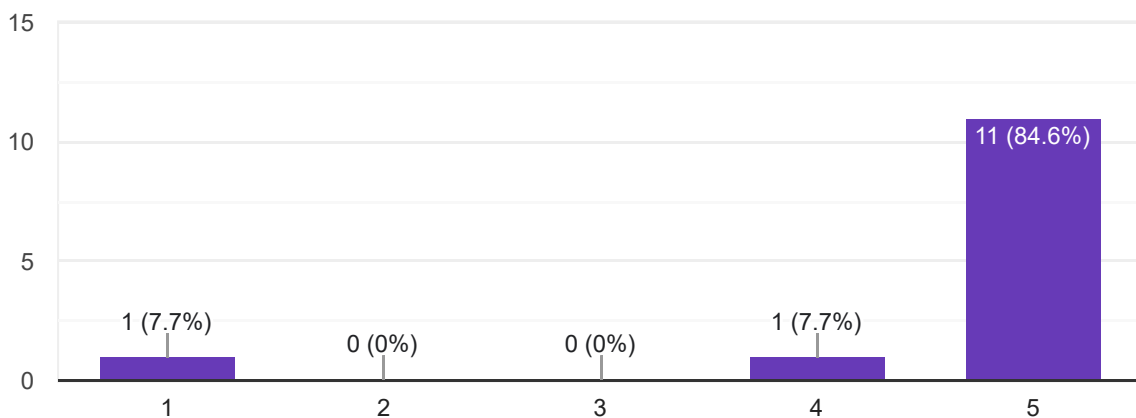

After the presentation, I better understand how prejudice can affect someone's chances in life.

13 responses

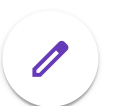

I believe that everyone, regardless of race, can succeed if they have equal access to education and opportunities.

13 responses

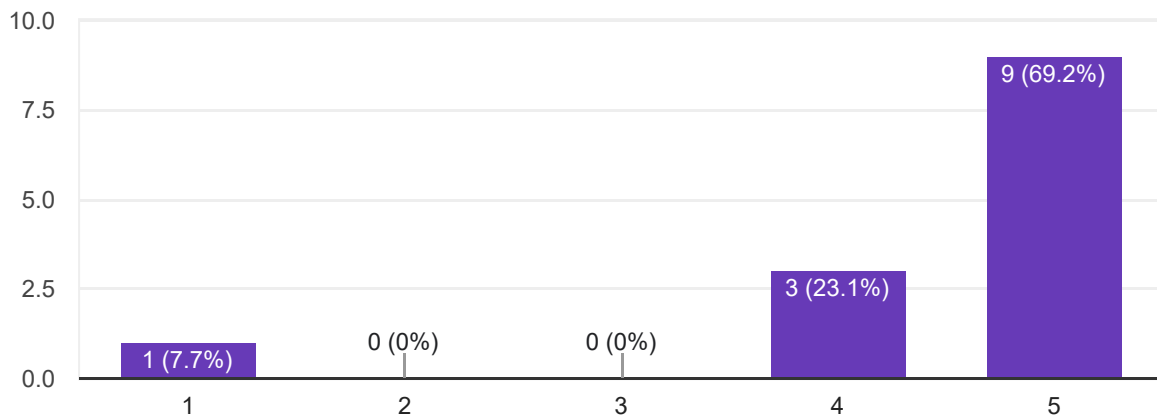

Critical Thinking and Social Empathy

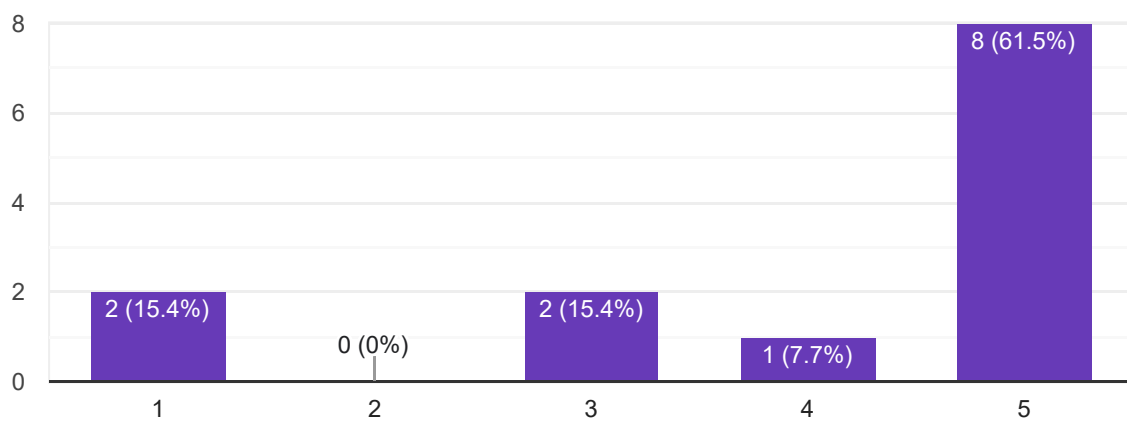

I can now recognize when someone expresses stereotypical or racist views.

13 responses

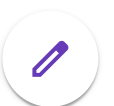

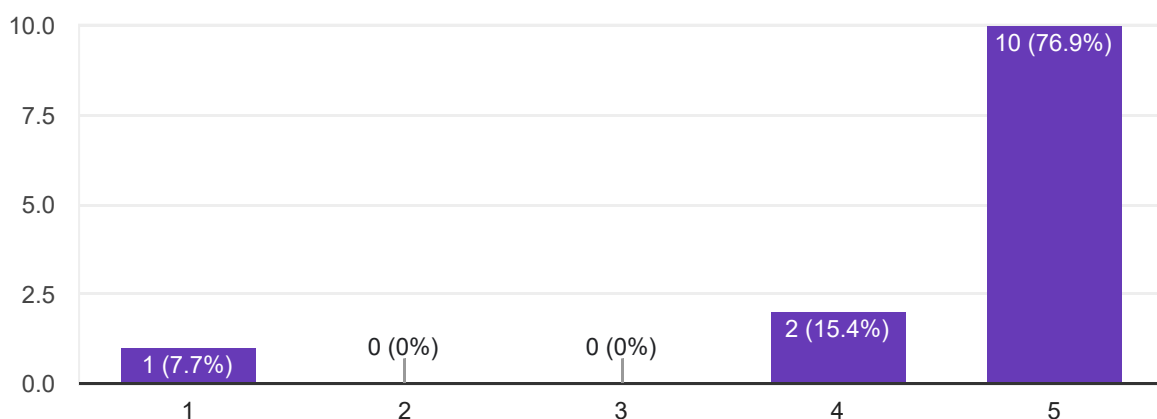

I believe that diversity makes society more creative and fair.

13 responses

I feel more willing to defend someone who is the target of racist or sexist comments.

13 responses

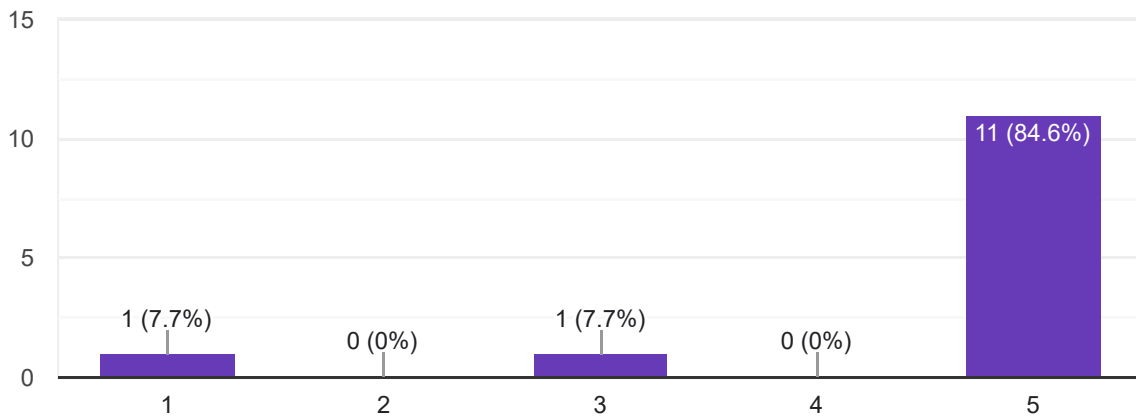

Evaluation of the Presentation

The presentation helped me think in a new and more creative way about human diversity.

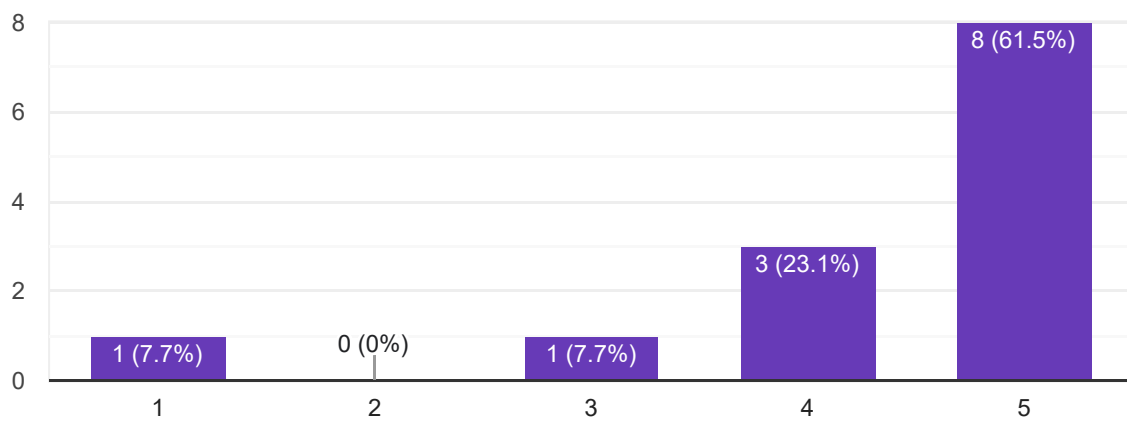

13 responses

The information and examples were convincing and easy to understand.

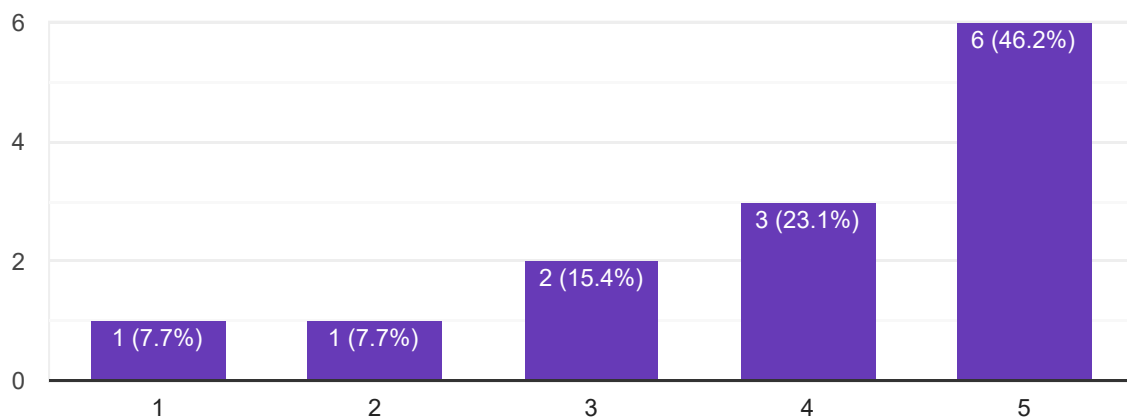

13 responses

I believe that after the presentation my view of people different from me has changed.

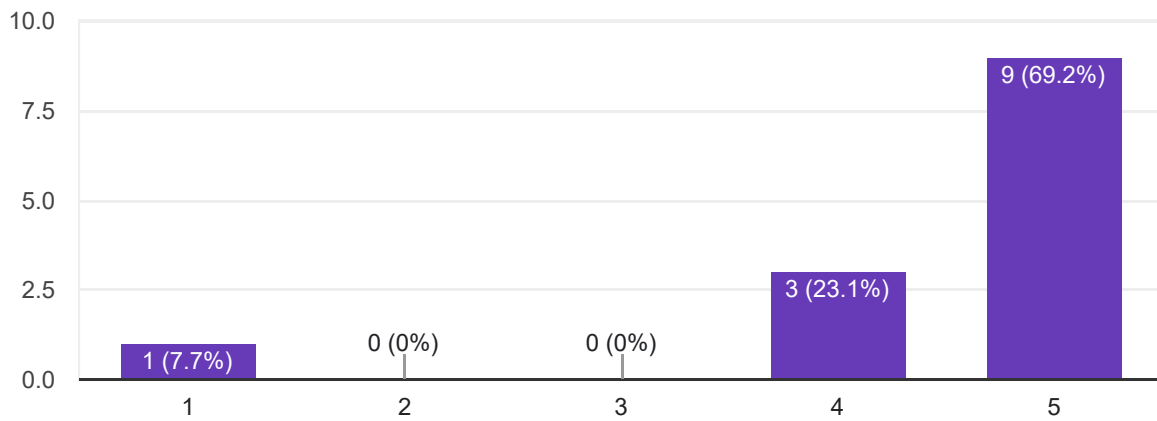

13 responses

The presentation made me reflect on how stereotypes can influence my daily life and choices.

13 responses

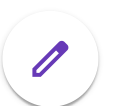

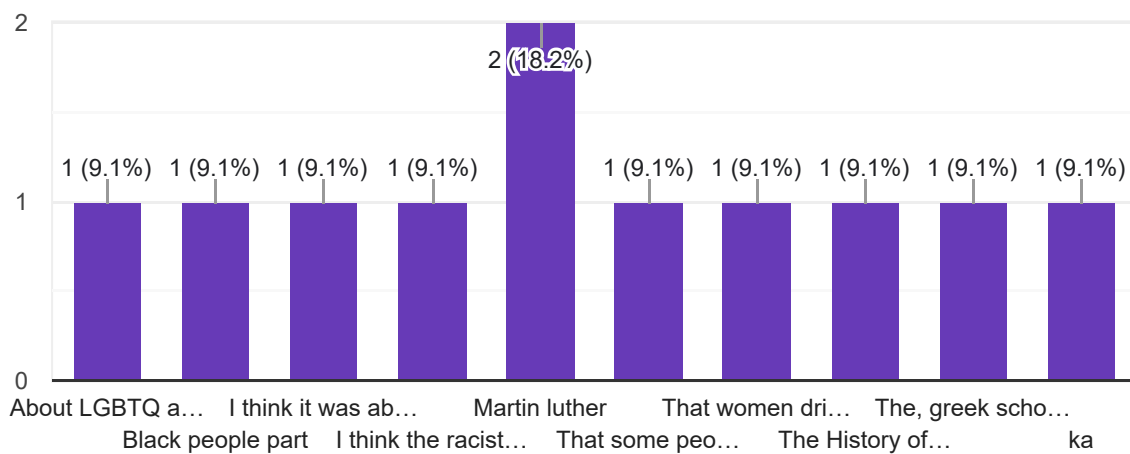

Open-ended Questions

Which part of the presentation impressed you the most, and why?

11 responses

Do you think anything has changed in the way you view people of different cultures, genders, or abilities? If yes, what?

12 responses

I always respected those

Yes, because I didn't know that KKK Clan existed.

I think it's not "always" about the cultur gender or abilities. It's about the characteristics of the people. If you're not educated or grow up with parents who still has the mindset from 100 years and they teach their children the same. The character is important and not the origin

Yeah about other people with a different sexuality

Women

Yes, no matter what culture or gender you are you can do it if you work for it

I always respect

It didn't really change, perhaps I agree with the Presentation already.

Yes, everyone should be treated equally with respect and you should not judge a book by its cover

Actually yes because I am so surprised that the old days used to be so aggressive I thought it was bright and happily and peaceful

ka

Nnope
